

ITALIAN  GENIUS IN GAS DETECTION TECHNOLOGIES

# SMART S

## PREMIUM LINE GAS DETECTORS

Designed to meet the toughest industrial requirements, SMART S line allows monitoring gas contents in harsh environments. These detectors are SIL2 (3) and ATEX certified and satisfy the strict requirements of Oil&Gas, Chemical and Petrochemical sectors as well as wherever the concept of Safety Integrity Level is a fundamental condition. A flexible line of products capable of adapting to all needs and able to offer the new **Hybrid Technology** based on the adoption of a double technology (IR+Pell) or based on the state of art **NDIR Technology** for flammable or toxic gases or based on the new **Laser Technology**. Detectors are certified according to the EN 50402 and IEC 61508 Parts 1 to 7.

*Sviluppati per garantire una rivelazione di gas sicura anche negli ambienti più difficili ed aggressivi, i rivelatori di gas serie SMART S sono certificati SIL 2(3) ed ATEX e sono stati studiati per soddisfare i restrittivi requisiti delle applicazioni nei settori Oil&Gas, chimico, petrolchimico ed ovunque il concetto di Safety Integrity Level sia una prerogativa fondamentale. Una famiglia di rivelatori flessibili nell'adattarsi ad ogni esigenza, gli unici ad offrire la nuova **tecnologia ibrida** basata sull'adozione di un sensore a doppia tecnologia (IR+Pell) o basato sulla più evoluta **tecnologia NDIR** per gas infiammabili o tossici o basato sulla nuova **tecnologia Laser**. Certificati secondo le EN 50402 e IEC 61508 Parti da 1 a 7.*

# PREMIUM LINE GAS DETECTOR

## SMART S-MS

**IR** POINT OPEN PATH

Designed to meet the toughest industrial requirements, **SMART S-MS** line offers **two** intrinsically safe sensor heads to monitor toxic and flammable contents in harsh environments. These two sensors (POP2) may have the same technology offering a **point open path** one to backup the other or two sensors to detect different levels of the same gas or different gases.

*SMART S-MS features:*

- Intrinsically safe sensor heads
- Two 4-20 mA 3-wire outputs
- Other features same as SMART S-SS

## SMART S-IR

**SMART S-IR** gas detectors employ a hybrid sensor, with double sensor technology, for flammable gas detection. They offer 5 status LEDs and an 8 digits back-lit display for the gas concentration reading to be chosen between LCD or LED display. The **SMART S-IR** have been especially developed for aggressive atmospheres, where the Pellistor sensors functionality could be seriously compromised. Industrial grade Infrared sensors are not vulnerable to poisoning, thus granting a higher accuracy and a longer lifetime to the detector. They feature non-intrusive calibration for an accurate and easy adjustment via Hall-effect switches, which allow to access the detector without opening the instrument and declassifying the area. The detectors can be housed in alloy or stainless steel housing and comply with SIL3 SW and SIL2 HW.

*SMART S-IR features:*

- Hybrid sensor technology integrated in one sensor head: Catalytic + Infrared with single 4-20 mA 3-wire output
- Other features same as SMART S-SS

## SMART S-SS

## SMART S-IS

Designed to meet the toughest industrial requirements, **SMART S-SS** line allows monitoring toxic and flammable contents in harsh environments. They offer 5 status LEDs and an 8 digits back-lit display for the gas concentration reading to be chosen between LCD or LED display. They feature non-intrusive calibration for an accurate and easy adjustment via Hall-effect switches, which allow to access the detector without opening the instrument and declassifying the area. The detectors can be housed in alloy or stainless steel housing and comply with SIL3 SW and SIL2 HW.

### SMART S-SS features:

- Single 4-20 mA 3-wire output
- RS485 serial communication Modbus
- 3 relay output (optional).
- HART communication interface (optional)
- Full Hot Swap for sensor replacement (optional)
- Sensor End of Life warning
- IECEx, ATEX II2G (GD with optional adapter) and SIL 2 (3) (EN50402 / EN61508 part 1-7)

### SMART S-IS features:

- Intrinsically safe protection and Galvanic Isolation
- Single 4-20 mA 3-wire output
- Other features same as SMART S-SS

POINT OPEN PATH FLAMMABLE

POINT OPEN PATH TOXIC

# SMART S - TRANSMITTER SELECTION

## MAIN BOARDS

- 1X** 1 Output 4-20 mA + RS 485
- 2X** 1 Output 4-20 mA + RS 485+ IS Barrier & Galvanic isolation
- 3X** 2 Output 4-20 mA + RS 485+ IS Barrier & Galvanic isolation
- 4X** 1 Output 4-20 mA + RS 485+ with Hybrid Technologies

## DISPLAY

- **LCD** 8-digit display (-20°C + 60°C)
- **LED** 8- digit display (-40°C + 65°C)

## OPTIONAL FEATURES

- 3 Relay Card
- 3 Relay Card & Hart Modem
- Hot-Swap

## FEATURES SELECTION

- X1** 4-20 mA + RS 485 Output-Display LCD
- X2** 4-20 mA + RS 485 Output-Display LED
- X3** 4-20 mA + RS 485 Output-Display LCD-3 Relay Card
- X4** 4-20 mA + RS 485 Output-Display LED-3 Relay Card
- X5** 4-20 mA + RS 485 Output-Display LCD-3 Relay Card-Hot Swap
- X6** 4-20 mA + RS 485 Output-Display LED-3 Relay Card-Hot Swap
- X7** 4-20 mA + RS 485 Output-Display LCD-3 Relay Card-Hot Swap-Hart Modem
- X8** 4-20 mA + RS 485 Output-Display LED-3 Relay Card-Hot Swap-Hart Modem

## ENCLOSURES

**1S STAINLESS STEEL FOR S-MS & S-IS**

**2S STAINLESS STEEL FOR S-MS, S-IS, S-SS & S-IR**

**5A ALUMINIUM FOR S-IR (CCCF-CHINA)**

**3A ALUMINIUM FOR S-SS, S-IR & S-IS**

**4A ALUMINIUM-COPPERFREE FOR S-SS, S-IR & S-IS**

# SMART S - HEADS & TECHNOLOGIES

## S4 [XXX GAS] SS head with sintered filter (for SMART S-SS)

- **PEL** Industrial matched pair pellistor for flammable gases
- **IRS** Industrial IRNET NDIR for flammable-SF6-CO2 gases
- **ECS** Premium line electrochemical cells for toxic gases
- **MOS** Industrial metal-oxide semiconductor for H2S

## S5 [XXX GAS] SS head without sintered filter (for SMART S-IS)

- **ECI** Premium Electrochemical cells for exotic toxic gases
- **PID** Photo ionization detector for VOC gases

## S3 [XXX GAS+GAS]

## SS head with sintered filter (for SMART S-IR)

- **HYB-FL** Hybrid technology IR+PELL for HC gases
- **HYB-TX** Hybrid technology MOS+ECeL or EC+Solid EC for H2S

## S6 [XXX GAS] SS head without sintered filter (for SMART S-IS)

- **IRM** Innovative IR, extremely fast t90, specific mirror
- **LAS-FL** Revolutionary Laser technology for specific HC reflection mode
- **LAS-TX** Revolutionary Laser technology for Toxic Gases reflection mode

## S7 [XXX GAS] SS head without sintered filter (for SMART S-MS)

**TX**

## S8 [XXX GAS] ROP-1 Laser Reflective Open Path

20-30 meter distance

**REFLECTOR**

**RX**

## S9 [XXX GAS] DOP-1 Laser Distance Open Path

Optical fiber 100 meter distance max

**TX**

# SMART S-DOP-1

DOP-1 RX

DOP-1 TX

DOP-1 DISTANCE OPEN PATH

Not just another "rabbits catcher" but a reliable low-cost open path. Due its own patent laser technology SMART S-DOP 1 & SMART S-ROP assure:

- Optical laser beam measurement, no physical reference channel
- Long area coverage
- Immediate response
- No false alarms from interference gases
- No consumable sensing elements
- Extremely long-term period maintenance
- Extremely high selectivity, precision and accuracy to target gas

Suitable for onshore and offshore, open and enclosed environments, the **SMART S-DOP** & **SMART S-ROP** represent the updated technology for methane detection in oil & gas exploration rigs, platforms, petrochemical refineries, landfill sites etc...  
 Detection of other gases (other than methane) available on request.  
 Detection of two gases **Laser DOP-2**, methane & H2S, available on request.

# GALILEO GAS & FIRE

**GALILEO GAS & FIRE Control Panel.** Two separate and fully independent systems, designed to meet the standards, are monitored by a common management supervisor. **THE GALILEO GAS MULTISYSTEM** is a fully approved SIL 3 System, both HW & SW according to EN 50402 and IEC 61508 part 1 to 7. The **EX FIRE MINI** is a fixed fire fighting system fully compliant with the requirements and test methods for electrical automatic control and delay devices specified in EN 12094-1 and EN 54-2. Compliance to the SIL 3 requirements for the detection and automatic extinguishing function is available upon request. All control panels are ATEX Certified according to EN 60079-29-1.

## FUNCTIONAL SAFETY GAS CONTROL PANELS

To offer a complete gas detection system, fully compliant to SIL2 and SIL3 requirements, Sensitron proposes the Premium line range, consisting of SMART S detectors along with GALILEO and MULTISCAN ++ control panels. Thanks to the full-redundancy of the hardware and the broad range of self-testing facilities, GALILEO panels are SIL 3 certified according to EN 50402 and IEC 61508 parts 1 to 7. Available in different models, these panel can monitor from 8 up to 256 detectors. For applications where a less restrictive SIL capability is required, Sensitron proposes MULTISCAN++S2 control panel, certified SIL2. All control panels are ATEX certified according to EN 60079-29-1.
